Brew #154

"Tjekkisk lager med Magnum humle (let citrus) og hjemmedyrket Saaz humle (græs, urt og let krydret). Den har en solid sødme, som vi har været vant til fra danske bryggerier. De fleste kan drikke den. Nogle vil måske kunne genkende Saaz-aftrykket, da eks. Hancock kun bruger denne humle."

Brew #155

"New England IPA med lidt havre til mundfylde, lidt hjemmedyrket Hallertau Bitter humle (blomst, let krydret), Chinook humle (fyrrenåle, harpiks) og Nectaron humle (passionsfrugt, fersken, grape frugt, ananas). Det er en moderne, lidt cloudy og meget juicy Indian Pale Ale. Ifht. andre NEIPAs er denne knapt så fed og sød, og har en del bitterhed. Det gør den nem at drikke flere af :)"

Brew #153

"Cold IPA med Motueka humle (citrus, krydret, tropisk, bær) og hjemmedyrket amerikanske bitter humler (citrus, fyrnåle, harpiks, blomst). En beskrivelse af en Cold IPA kunne være en virkelig stærk American Light Lager (pilsner + ris/majs) med bitterhed fra en West Coast IPA (C-Hops)."
